Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. Applicant's arguments, see page 10, filed 22 December 2005, with respect to the rejection(s) of claim(s) 1, 17-21 under 35 USC§102 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of DE'866 in view of Kenneally et al. (US Pat. 6,965,043).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

3. Claims 1-8, 10, 14-21 rejected under 35 U.S.C. 103(a) as being unpatentable over DE'866 (translated) in view of Kenneally et al. (US Pat. 6,965,043).

DE'866 teaches the preparation of light colored fatty acid polyol esters wherein transesterification takes place between a fatty acid esters and polyol (glycerin) in the presence of a catalyst and borohydride. The resulting Lovibond bond color is of less than 10, a reaction temperature ranging from 80 to 260°C, applicable catalyst and reducing agents are listed in sections [0010] & [0009].

Art Unit: 1621

The claims differ from the reference by not citing the source of the fatty acid esters, their preparation. It would have been obvious to one of ordinary skill in the art at the time that the invention was made to modify the process disclosed in DE'866 to incorporate these modifications. US 043 discloses that fatty acid ester can be prepared from vegetable oils and distilled after being produced.

Therefore in view of the art cited supra, the instant invention is rendered obvious.

Allowable Subject Matter

4. Claims 24-53 are allowed.
5. Claims 11-14, 22-23 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Deborah D. Carr whose telephone number is 571-272-0637. The examiner can normally be reached on Monday-Friday 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Johann Richter can be reached on 571-272-0646. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
